SINELAB BRAND **GUIDELINES**

Logo, colours, fonts, icons and imagery for the new website and everything that follows it.

PREPARED FOR

Sinelab Technologies

INCLUDES	VERSION	DATE	PREPARED BY
Guide + asset pack	1.0 · Website launch	October 2026	Eleven:11 Services

01

Brand at a Glance

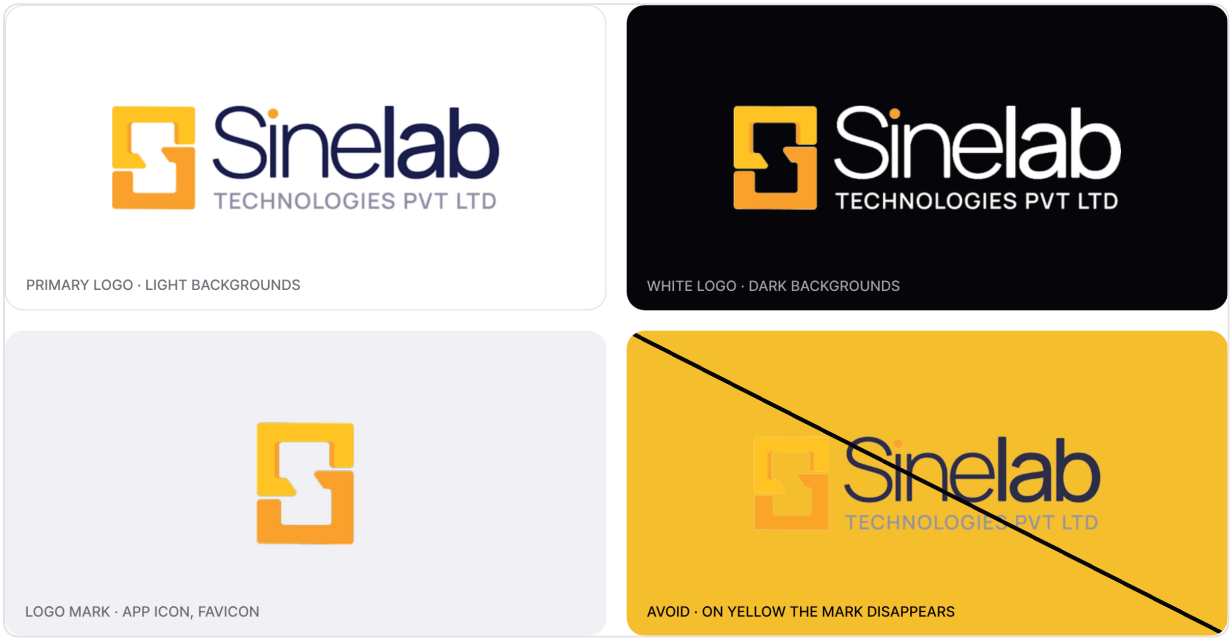

These guidelines keep Sinelab looking and sounding the same everywhere: the **website**, social media, brochures, signage and proposals.

POSITIONING	**Kerala-rooted engineering and manufacturing** An industrial heritage dating to 1996, delivering solar, energy storage, lighting and related energy solutions to homes, businesses and industries.
TAGLINE	**Powering Tomorrow.** Used in the website hero and footer. Keep the full stop when it stands alone.
PERSONALITY	**Confident, human, engineering-led, premium, credible** Show real work, real people and long-term relationships rather than big claims.
LOOK	**Black, white and Sinelab Yellow** Mostly black and white, with yellow used as a highlight, never as a large background.

02

Logo

Use the logo exactly as supplied. Choose the version that gives the **strongest contrast** with the background.

Clear space: keep an empty margin around the logo at least the width of the “S” mark’s top bar (x). Minimum size keeps “TECHNOLOGIES PVT LTD” readable.

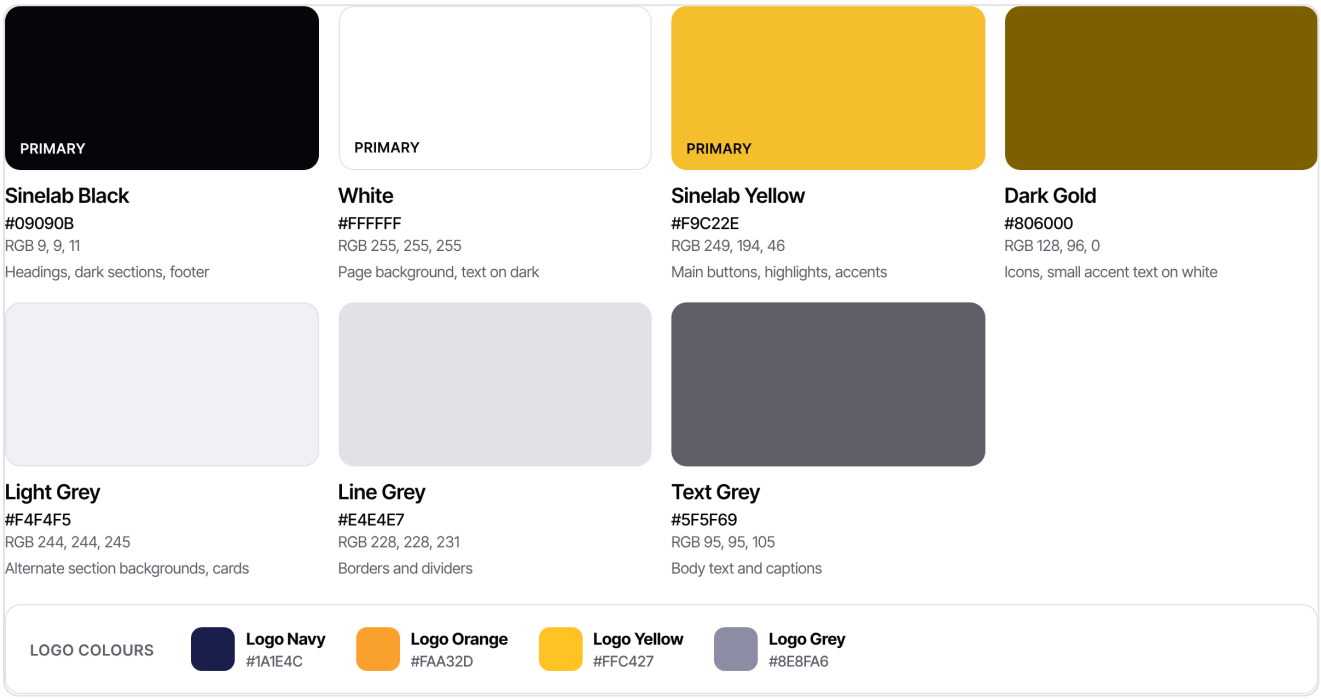

Do and avoid

- Use the primary logo on white or light grey, and the white logo on black or dark photos.
- Use the logo mark on its own only where the name already appears nearby, such as an app icon, favicon or profile picture.
- Don’t stretch, rotate, recolour, add shadows or outline the logo.
- Don’t place the logo on Sinelab Yellow or on busy parts of a photo.

03

Colours

Three primary colours do most of the work. Support colours keep pages calm and readable.

Colour	HEX	RGB	CMYK (approx.)	Use
Sinelab Black	#09090B	9, 9, 11	0, 0, 0, 96	Headings, dark sections
White	#FFFFFF	255, 255, 255	0, 0, 0, 0	Backgrounds, text on dark
Sinelab Yellow	#F9C22E	249, 194, 46	0, 22, 82, 2	Buttons, highlights
Dark Gold	#806000	128, 96, 0	0, 25, 100, 50	Icons, accent text on white
Light Grey	#F4F4F5	244, 244, 245	0, 0, 0, 4	Section backgrounds, cards
Text Grey	#5F5F69	95, 95, 105	10, 10, 0, 59	Body text, captions

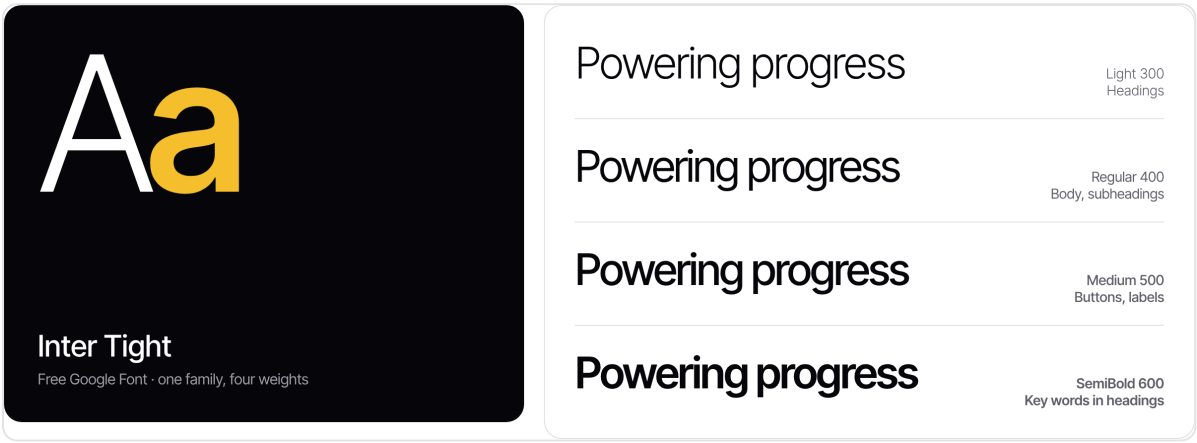

- Keep yellow for buttons and small highlights. A page should be mostly black, white and light grey.
- Use Dark Gold, not yellow, for small text or icons on white, so they stay readable.
- Logo colours (navy, orange) belong to the logo only and aren't used elsewhere on the website.

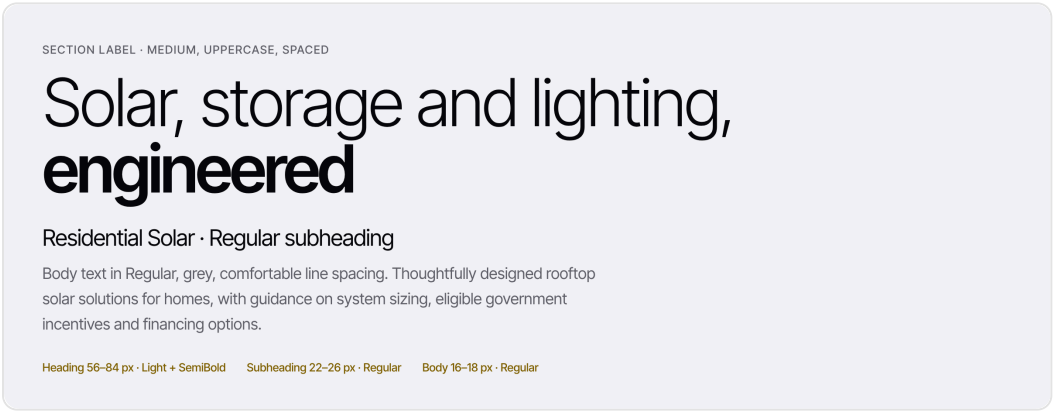

CMYK values are close starting points for print. Ask the printer for a proof before large runs.

04

Typography

One font family, **Inter Tight**, in four weights. It is free to use from Google Fonts and matches the clean shapes of the logo.

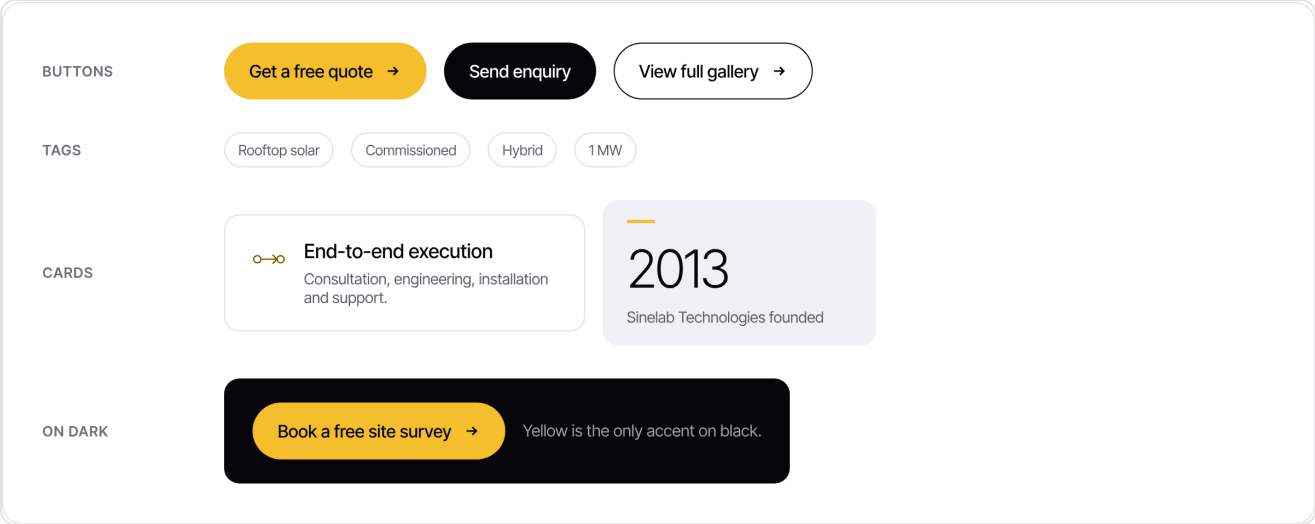

Use	Weight	Website size	Notes
Main headings	Light 300 + SemiBold 600	56–84 px	Highlight 1–3 key words in SemiBold
Subheadings	Regular 400	22–26 px	Sentence case
Body text	Regular 400	16–18 px	Text Grey, generous line spacing
Buttons and labels	Medium 500	13–16 px	Section labels in uppercase with wide spacing

Download: fonts.google.com/specimen/Inter+Tight. In Word or PowerPoint where Inter Tight isn't installed, use Arial.

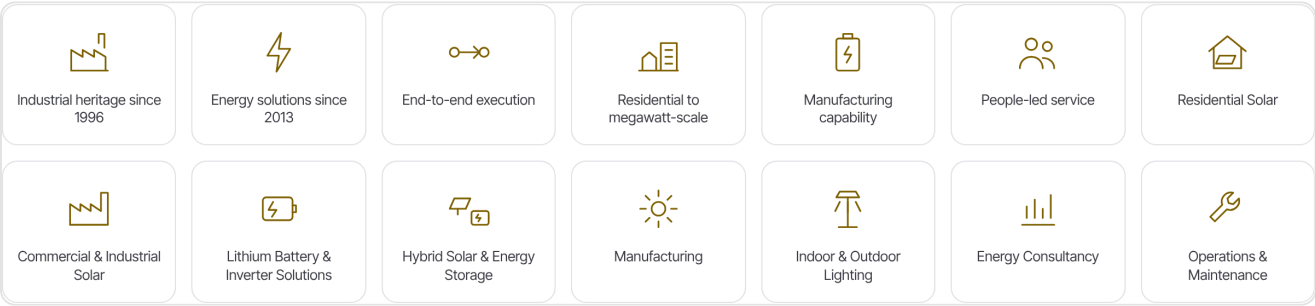

05

Buttons, Icons & UI

Rounded, simple elements with plenty of space. The yellow button is the **main action**; keep one per screen where possible.

Icon set

Thin line icons (1.5 px stroke). Dark Gold on light backgrounds, Sinelab Yellow on dark. SVG files are in the asset pack.

- Buttons are fully rounded (pill shaped) with an arrow when they lead somewhere.
- Cards use soft rounded corners, a thin grey border and no heavy shadows.
- Short yellow lines and small yellow dots work as accents. Avoid large yellow areas.

06

Photography

Real Sinelab work is the strongest brand asset. Show **finished installations, the team on site and the people behind the work**.

Style reference only. These are sample images used on the preview website and must be replaced with Sinelab's own photographs before launch.

- Drone and wide shots of rooftop and ground-mounted plants, in clear daylight or warm early-morning and evening light.
- Close-ups of panels, inverters, batteries and the Kanjikode manufacturing facility.
- Engineers and installers at work, with their permission. Customer homes and faces only with written consent.
- No stock photos presented as Sinelab projects, and no heavy filters or artificial skies.

07

Tone of Voice

Write like this	Avoid
"Installation complete; commissioning pending."	Calling a project commissioned before it is
"Savings depend on your usage, tariff and system size."	"Guaranteed savings" or fixed payback promises
"A flagship 1 MW rooftop project."	"Kerala's largest" without verified proof
Short sentences, plain words, numbers first	Jargon, exclamation marks, hype

08

Asset Pack Contents

Everything in this guide is in the ZIP file shared with it.

Folder	What's inside
01_Logo	Colour and white logos (PNG), logo mark, app icon, previews on white and black
02_Colours	Colour palette sheet (PNG) and colour codes (TXT)
03_Typography	Font specimen sheets and the free download link
04_Icons	14 website icons as SVG files
05_UI_Elements	Buttons, tags and card styles (PNG)
06_Website_Images	Images used on the preview website (samples to be replaced)

STILL NEEDED FROM SINELAB

Original vector logo (AI, SVG, EPS or PDF; the current file is web resolution only), real project and drone photography, leadership portraits, and approved social media links.
