SINELAB TECHNOLOGIES WEBSITE CONTENT MASTER DOCUMENT

Sinelab Technologies Pvt. Ltd. | Agency handoff for Eleven:11 | Draft for approval | October 2026

Brand story / Homepage / Services / Featured projects / Leadership / Gallery / FAQs / Contact / Legal and media checklist

Editorial convention: Publishable draft copy is presented in regular text. Items requiring confirmation are marked as pending. Agency implementation notes are not intended for the public website.

1. Brand Positioning & Website Direction

Positioning: A Kerala-rooted engineering and manufacturing company with an industrial heritage dating to 1996, delivering solar, energy storage, lighting, and related energy solutions to homes, businesses, and industries.

Voice: Confident, human, engineering-led, premium, credible. Emphasize demonstrated work, people, long-term relationships and capability rather than exaggerated superlatives or guaranteed financial outcomes.

Primary navigation: Home | About Us | Solutions | Projects | Gallery | Our People | Contact. FAQs can appear on the homepage and relevant service pages; legal links belong in the footer.

2. Homepage - Copy and Layout

Hero - three sequential visual segments

Segment 1: Pyarelal 1 MW rooftop installation. Headline: "Powering Progress. At Scale." Supporting line: "Engineering rooftop solar solutions for a more sustainable tomorrow." CTA: "Explore Our Projects".

Segment 2: Mannukkad 1 MW ground-mounted project. Headline: "Turning Land Into Lasting Energy." Supporting line: "Purpose-built solar infrastructure for growing energy needs." CTA: "Our Solutions".

Segment 3: Industry recognition photograph. Headline: "Excellence That Earns Recognition." Supporting line: "A journey shaped by entrepreneurship, engineering and trust." CTA: "Discover Our Story".

Hero production note: Use original drone footage and the authentic award photograph. The Pyarelal project must not be called commissioned while commissioning remains pending. Any "one of Kerala's largest" comparison requires validation before publication.

Homepage introduction

From Lighting Roads to Powering Futures. Rooted in the manufacturing legacy of SARK Group, Sinelab Technologies has evolved from industrial and public-infrastructure lighting into a comprehensive energy solutions company. Today, we bring together engineering expertise, manufacturing capability and hands-on project execution to help homes, businesses and industries embrace dependable, future-ready energy.

Reasons to choose Sinelab - suggested six cards

- Industrial heritage since 1996 - A foundation in engineering and manufacturing.
- Energy solutions since 2013 - Experience across lighting, solar and storage.
- End-to-end execution - Consultation, engineering, installation and support.
- Residential to megawatt-scale - Solutions shaped around project needs.
- Manufacturing capability - Batteries, inverters, lighting and group cable manufacturing.
- People-led service - Dedicated technical and project teams.

Suggested homepage flow

Hero videos > About snapshot > Eight solution cards > Featured projects > Company milestones > Leadership preview > Testimonials (when approved) > Consultation CTA.

3. About Us - Company Story

Built on a Legacy. Driven by a Vision. Powered by Progress.

Some journeys begin with a business plan. Ours began with two classmates who shared an ambition to build something meaningful. In 1996, Sajeev Kumar K and Sunil Joseph established SARK Cables in Kanjikode, laying the foundation for a manufacturing journey that would grow across regions and industries.

Their commitment to industrial development led to further manufacturing expansion: a plant in Thodupuzha in 2002, a facility in Coimbatore in 2008, and manufacturing operations in Qatar. These milestones built the engineering, operational and entrepreneurial foundations of the wider group.

In 2013, that experience gave rise to Sinelab Technologies - a new chapter dedicated to energy and sustainability. Sinelab initially focused on industrial lighting, high-mast and streetlighting systems, solar streetlight batteries and related solutions. Its work contributed to lighting infrastructure across major junctions and public spaces in Kerala.

In 2018, the entrepreneurial journey received recognition through the Asianet Keerthimudra Award in the Electrical and Electronics sector. A year later, Sinelab reached an important solar milestone with a government 20 kW off-grid installation serving a tribal village in the Nelliampathy Hills - a project that represented more than electrical infrastructure: access to dependable power for a community.

In 2024, Sinelab advanced its manufacturing capabilities with a facility in the Kanjikode Industrial Area for lithium batteries and integrated lithium inverter solutions. This strengthened its ability to serve customers seeking both clean generation and reliable energy storage.

In 2025 alone, Sinelab commissioned approximately 4-5 MW of solar installations across customer segments. In 2026, the company completed installation work on a flagship 1 MW on-grid rooftop solar project, with commissioning pending. Each milestone reflects the same philosophy that shaped the founders' early journey: build with purpose, deliver with responsibility, and keep progressing.

Our journey began with lighting the way. Today, we are helping power the future. And the journey continues.

Pending / verify: Confirm official award names and years, the historical spelling of SARK Cables, Thodupuzha plant details, Qatar manufacturing entity and any claims such as "largest" before publication.

Vision

To be at the forefront of renewable energy adoption, empowering businesses and communities with high-quality, reliable and innovative energy solutions that make sustainability both accessible and economically rewarding.

Mission

To be a trusted one-stop energy solutions partner for residential, commercial and industrial customers, delivering quality products, expert engineering, seamless execution and dependable service at every stage of their energy journey.

4. Solutions - Eight Service Cards

Residential Solar

Thoughtfully designed rooftop solar solutions for homes, with guidance on system sizing, eligible government incentives and financing options.

Commercial & Industrial Solar

Engineered rooftop and ground-mounted solar power plants that help businesses plan for long-term energy performance.

Lithium Battery & Inverter Solutions

Advanced battery and inverter solutions designed for dependable energy storage and backup applications.

Hybrid Solar & Energy Storage

Integrated solar and battery systems designed around energy savings, resilience and selected backup loads.

Manufacturing

Manufacturing expertise spanning lithium batteries, integrated inverters and industrial lighting, supported by the wider group's cable manufacturing heritage.

Indoor & Outdoor Lighting

Lighting solutions for industrial, commercial and public-infrastructure applications, including high-mast and floodlighting.

Energy Consultancy

Practical energy assessments, technical evaluation and system recommendations aligned with each site's requirements.

Operations & Maintenance

Inspection, performance support and ongoing maintenance services in line with the agreed scope of work.

Pending / verify: Review the precise manufacturing entity for each product line; do not imply all SARK Group products are manufactured by Sinelab Technologies itself.

5. Featured Projects - Seven Case Studies

Pyarelal - 1 MW Rooftop Solar

A flagship large-scale rooftop solar installation demonstrating Sinelab's ability to coordinate complex, high-capacity projects. Installation completed; commissioning pending.

Mannukkad - 1 MW Ground-Mounted Solar

A utility-scale ground-mounted solar installation reflecting Sinelab's experience in engineering and executing substantial solar infrastructure.

Sree Devi Durga Theatre - 100 kW

A commissioned on-grid solar project in Palakkad, developed for a distinctive, steeply sloped theatre roof using a raised installation approach.

Boopathi Steels - 400 kW

An ongoing industrial solar project, demonstrating Sinelab's continued work with energy-intensive commercial and manufacturing customers.

Bala Cinemas - 170 kW

A completed rooftop installation incorporating Enphase microinverters to address site-specific shading conditions on a challenging roof.

Saleem Residence - 20 kW Hybrid

A residential hybrid solar solution combining clean generation with battery-backed functionality, designed around the household's energy needs.

SA Square Apartments - Capacity Pending

A residential apartment solar project involving site-specific rooftop access and structural considerations.

Pending / verify: Verify exact project names, capacities, location, completion/commissioning dates, permission to publish, technical specifications and images. In particular, confirm SA Square capacity; Saleem residence commissioning and battery details; and whether the Bala Cinemas roof description is approved. Avoid unverified savings or payback claims.

6. Milestones & Recognition

1996

SARK Cables established in Kanjikode by Sajeev Kumar K and Sunil Joseph.

2002

Manufacturing expansion to Thodupuzha.

2008

Manufacturing expansion to Coimbatore.

2013

Sinelab Technologies established as an energy-focused venture.

2018

Asianet Keerthimudra entrepreneurial recognition in the Electrical and Electronics sector.

2019

Government 20 kW off-grid solar project in the Nelliampathy Hills.

2024

Kanjikode manufacturing facility for lithium battery and integrated inverter solutions.

2025

Approximately 4-5 MW of solar installations commissioned during the calendar year; additional industry recognition reported.

2026

Installation completed on a flagship 1 MW rooftop project; commissioning pending.

Pending / verify: Official title and date of minister-presented award; whether Kerala Vision recognition is a separate award; permission for all award photos. Do not publish a lifetime MW total or project count without audited figures.

7. Our People - Leadership

Section headline: The People Behind the Progress.
Subheading: Visionary founders. Experienced professionals. A new generation of leadership.

From Classmates to Industry Leaders

Mr. Sajeev Kumar K - Managing Director

An industrialist and entrepreneur with a legacy spanning three decades, Mr. Sajeev Kumar K began his entrepreneurial journey alongside his classmate and business partner, Mr. Sunil Joseph, establishing SARK Cables in Kanjikode in 1996. Together, they expanded their manufacturing presence to Thodupuzha in 2002, Coimbatore in 2008, and internationally through manufacturing operations in Qatar. A former President of the Kanjikode Industries Forum, he has played an active role in Kerala's industrial ecosystem. His commitment to engineering, enterprise and sustainable growth helped shape the establishment of Sinelab Technologies in 2013.

Mr. Sunil Joseph - Director

An entrepreneur and business leader, Mr. Sunil Joseph has been instrumental in the growth and diversification of the SARK Group since its beginnings in 1996. From establishing manufacturing operations alongside Mr. Sajeev Kumar K to expanding into renewable energy through Sinelab Technologies, his journey reflects a commitment to enterprise development and innovation. He has been recognised for his entrepreneurial contributions, is involved in industry associations including KSSIA, and shares practical business insights with management students and aspiring entrepreneurs as an entrepreneurship mentor and industry speaker.

Mr. Athul S. Krishna - Chief Marketing Officer

With a background in Electrical and Electronics Engineering and postgraduate certification in Business Analytics from IIT Roorkee, Athul S. Krishna combines technical understanding with business strategy. Representing the next generation of leadership at Sinelab, he heads the company's Kochi operations and contributes to regional expansion, brand development, customer relationships and new market opportunities.

7. Our People - Executive Management (continued)

Mr. Sravan Paul Sunil - Chief Operating Officer

A graduate of SRM Institute of Science and Technology, Chennai, Sravan Paul Sunil supports Sinelab's operational management, project coordination and site execution.

Mr. Ravindran Menon - Head of Solar Division

Ravindran Menon leads the Solar Division, supporting the planning, coordination and delivery of renewable energy projects.

Mr. Vipin R. - Head of Project Division

Vipin R. heads the Project Division, helping coordinate project execution and implementation across engineering assignments.

Mr. Prakash Menon - General Manager

A long-standing member of the Sinelab team, Prakash Menon brings organizational knowledge and management experience to the company's day-to-day operations.

Pending / verify: Confirm all designations and biographies with individuals, especially founders' awards, KSSIA role, SRM qualification and exact operational responsibilities. Do not assert an unverified tenure for Prakash Menon. Use approved portraits.

8. Customer Testimonials

Headline: The Trust We've Earned.
Subheading: Beyond every successful installation is a relationship built on confidence, quality and commitment.

Design: a mix of short written testimonials and video interviews from industrial, commercial and residential customers. Display name, organization/project, customer category and photo only with consent. Video tiles should be visually prominent, with optional text excerpts supplied by the customer.

Pending / verify: All testimonials, customer names, videos, star ratings and permissions. Do not generate sample customer quotes. Hide the section until authentic approved material is ready.

9. Dedicated Gallery

Headline: A Glimpse Into Our World.
Introduction: From manufacturing floors to megawatt-scale solar installations, explore the people, engineering and milestones behind Sinelab.

- Solar Installations - Rooftop, ground-mounted, residential, commercial and industrial.
- Manufacturing & Innovation - Cables, batteries, inverters, lighting and production facilities, with correct company attribution.
- Our People at Work - Engineering, installation, commissioning and team activities.
- Milestones & Recognition - Awards, company achievements and significant events.

Agency note: Dedicated gallery page with category filters, mobile-friendly image viewing, captions, alt text and lazy-loaded media. Original drone footage and manufacturing photographs will be supplied later. No stock imagery should be presented as Sinelab project work.

10. Frequently Asked Questions - Approved Eight

How much can I save by installing solar panels?

Savings depend on electricity consumption, tariff, system capacity, solar generation and how electricity is used. Sinelab assesses each customer's requirements and provides a project-specific estimate before installation.

How do I know what solar capacity is right for my home or business?

Our team reviews electricity bills, installation space, electrical requirements and future energy needs to recommend an appropriately sized system.

Are government subsidies available for residential solar installations?

Eligible residential consumers may receive assistance under applicable government solar schemes, including PM Surya Ghar. Eligibility and amounts depend on current scheme rules and system specifications.

Does Sinelab provide assistance with solar financing?

Sinelab can guide customers through available financing options and documentation, subject to lender eligibility, terms and approval.

What is the difference between on-grid and hybrid solar?

An on-grid system works alongside the utility grid and generally does not provide backup during a power outage. A hybrid system can incorporate battery storage to support selected loads during outages, depending on its design.

How long does a solar power plant last?

Solar modules are commonly designed for a service life of 25 years or more, while inverter, battery and other component lifespans vary. Performance depends on equipment, installation conditions and maintenance.

Does Sinelab provide maintenance and after-sales support?

Yes. Sinelab offers operations and maintenance services, including system inspection, performance support and technical assistance according to the agreed service scope.

Does Sinelab undertake large commercial and industrial projects?

Yes. Sinelab undertakes solar EPC projects for residential, commercial and industrial applications, including rooftop and ground-mounted installations.

Agency note: Eight FAQs only. Retain financing and subsidy questions. Do not hardcode subsidy amounts, warranty promises, generation or payback figures without current verification.

11. Contact Us

Headline: Let's Power Your Next Move.
Introduction: Whether you're planning solar for your home, exploring energy solutions for your business, or developing a large-scale industrial project, our team is here to help.

Registered company: Sinelab Technologies Pvt. Ltd.

Phone: +91 99462 07738

WhatsApp: +91 99462 07738

Email: info@sinelabtechnologies.com

Locations: Palakkad and Kochi, Kerala - full addresses pending

Contact form specification

Fields: Full name (required); phone number (required); email (optional); interest category (Residential Solar, Commercial & Industrial Solar, Hybrid Solar & Battery, Other Energy Solutions); project requirements/message. Route submissions to info@sinelabtechnologies.com only. Include validation, spam protection, consent language, success/failure messages and appropriate email-delivery configuration.

Include floating WhatsApp access, click-to-call phone link, email link and maps once addresses are provided.

12. Footer, Privacy & Legal Requirements

Footer

Display Sinelab Technologies Pvt. Ltd.; Palakkad and Kochi office locations; phone and email; links to main pages; approved social media links; Privacy Policy; Terms & Conditions; cookie settings/notice if applicable; and copyright notice. Use approved logos and brand assets.

Privacy Policy - drafting brief

Describe what personal information the enquiry form collects, why it is collected, how submissions are delivered and retained, whether analytics/advertising cookies are used, who can access data, and how visitors can contact the company about privacy requests. Draft based on the actual website stack and operations; do not assert security controls or deletion timelines without confirmation.

Terms & Conditions - drafting brief

Cover informational nature of website content, intellectual property, permitted website use, third-party links and reasonable limitations. Make clear that project quotations, performance estimates, subsidy eligibility, financing, warranties and commercial terms are governed by the relevant written proposals and agreements.

Cookies and consent

Determine whether analytics, marketing pixels, embedded video players or other non-essential technologies are deployed. Implement disclosures and consent controls appropriate to the actual tools and applicable law. Obtain legal review before publishing policy text.

Pending / verify: Complete addresses, legal review, exact social links and the actual cookie/analytics configuration. This document contains legal drafting requirements, not a finalized legal opinion.

13. Agency Implementation Notes

- Prioritize original project photography and drone video; optimize loading for mobile.
- Use premium, spacious typography, clear calls to action and accessible contrast.
- Separate publishable copy from internal placeholders and production instructions.
- Add descriptive image alt text and structured project information where verified.
- Ensure all enquiry form submissions reach the confirmed company email.
- Obtain permission before publishing customer identities, logos, site images or reviews.
- Do not state a project is commissioned when only installation is complete.
- Avoid unsupported "largest", "guaranteed savings", "30-year life" or award-ranking claims.

14. Outstanding Assets and Verification Checklist

- Full Palakkad office address and map link; full Kochi office address and map link.
- Original company logo, brand colours/fonts, approved social profile URLs.
- Founder/management portraits and individual biography sign-off.

- Verified award names, dates, photographs and association titles.
- Featured project capacities, sites, statuses, dates, technical claims and customer permissions.
- Pyarelal commissioning confirmation when completed.
- Original gallery drone footage, manufacturing photos and installation images.
- Genuine customer testimonials and publication permissions.
- Legal review and actual privacy/cookie implementation details.

Editorial status: Core content assembled. This is an agency-ready working draft, not a declaration that every project, award or personal claim has been independently verified.
